Application/System Name: Market Pricer

Market Pricer is our free-to-use website that will help you shop quickly and efficiently when you need to split the cost of one big shopping trip. If you live with other people and shop together, you can split the cost of certain items allowing for easy budgeting between roommates. All you have to do is list how many people you want to split it with and your names!

Business Rules

1. There is no need to sign up or log in to use the webpage.

2. There will be no form of payment taken on the web page, the site will only inform the user of all prices related to their search.

3. All the information will be taken from the public domain and is legal to utilize for non-commercial purposes.

4. The user must provide some name or alibi when prompted to which the table can utilize.

5. No user information that is given (such as names) will be stored in our database and will be deleted after each session.

6. After saving the list as a PDF, the session will be destroyed and the list will need to be remade.
